Robotics Project Rubric

Robotics Notebook

The following are the requirements for your Robotics Notebook, which is the record of your activities during the robotics portion of this course and constitutes the Robotics Project.

Points	Description
5	Submitted a Google Document following the template provided. Name and period number filled in on title page. Fonts and header styles are intact and same as given in template. All red comments in the template removed before submission of the final document. Page numbering is intact and accurate. Followed template instructions. Project information table filled in correctly.
5	A neat easy to read table of contents (ToC) at the front of your notebook that includes the given main headers and appropriate subheaders and their starting page numbers.
25	Daily entries are present for every class day, even if absent. Entries are narrative in style and sufficient to describe the day's activities. Follows all instructions listed in the template and project description slides.
25	Each robot build is included as a subheader in the robot build section and included in the ToC. Follows all instructions listed in the template and project description slides.
15	All challenges recorded in the Challenges section of your notebook as a subheader with the name of the Challenge and included in the ToC. Follows all instructions listed in the template and project description slides.
10	Each assignment has an entry in the Assginments section of your notebook. Each assignment title is listed as a subheader and is included in the ToC. Follows all instructions listed in the template and project description slides.
10	Class notes are included in the Class Notes section and are sufficient for the entire robotics section of this course.
5	Attractiveness, neatness, and general appearance of your notebook
100	**Total**
