VEX IQ Robotics

Robotics Project

Project: Robotics Notebook

- Your Notebook is your project
- Follow the given template and instructions
- Follow the rubric provided
- Work on it every class day

Take Credit for Your Work!

- Add your name and period number to the title page
- Receive credit for all your hard work
- Title page is part of the Project Rubric

Major Sections of Your Notebook

Here are the major sections of your notebook:

- Project Information
- Daily Entries
- Robotic Builds
- Assignments
- Challenges
- Class Notes

Table of Contents (ToC)

- The pages immediately following your title page are for your Table of Contents or ToC
- Each major section of your notebook is formatted as Heading 1
- This makes finding your entries easier
- Follow the instructions listed in the notebook template
- The ToC is part of the Project Rubric

Daily Entries Section

All of your daily entries must begin with the day and date on a single line as follows:
Tuesday 11/17/2026
And then the text of your daily entry begins on the next line.

- Daily entries are expected for EVERY day in class, even days you are absent.
- Individual daily entries are NOT required as subheadings in the ToC
- Provide substantial details. A single sentence is not sufficient!
- The daily entries section is part of the Project Rubric
- Your daily entries should NOT be Q&A style. They should be narrative style.

Include the following information in your Daily Entry:

- What did you do?
- What role did you play today? Record your role today. Some days you might do all three.
  - Hardware Engineer (alternate every other build)
  - Software Engineer (alternate every other build)
  - Student
- Did you have any problems come up? If so, did you solve them? How did you solve them?
- What did you learn today?

Robot Builds Section

- For each of your robot builds, you need an entry
- Start it on new page with title (name of the robot build)
- Can be more than one page as needed
- Narrative description of your robot and this build task
  - One or two paragraphs describing your robot and this task. Include any issues you had and how you overcame them. Did you enjoy doing the build? What was the best part?
- A hand drawn sketch of your robot
  - This is how you are going to build it and you can use the instructions photo as a guide.
  - Scan or photograph it and insert into your notebook
- A block diagram of your robot for electrical connections
  - Robot brain
  - All motors connected
  - Any connected sensors
  - The port numbers where connected to your robot brain
  - Include controller if used with this build
- Insert a picture of your finished robot
- Must be included in the table of contents (ToC) by name of robot build
- Part of the Project Rubric

Challenges Section

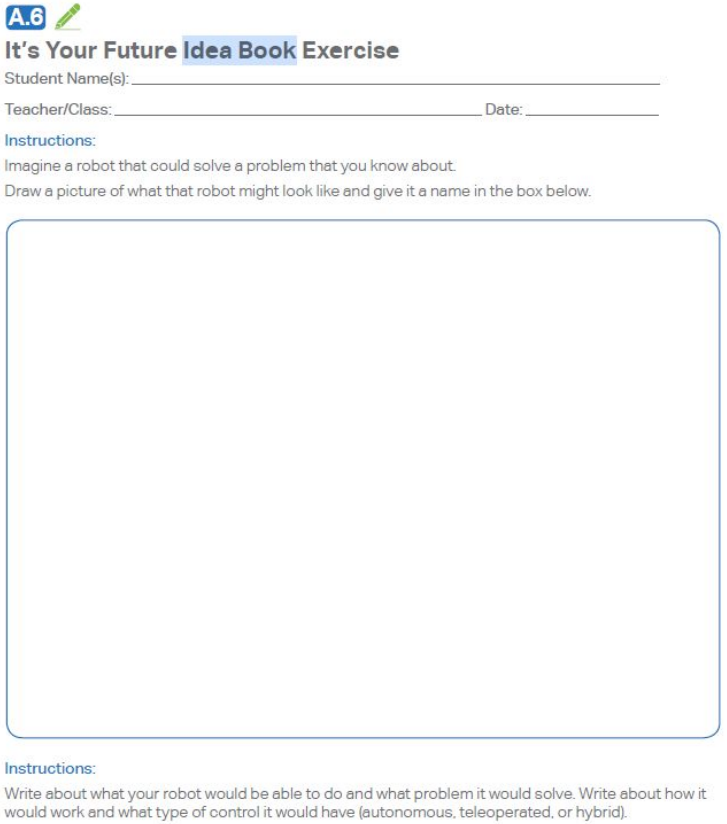

- On its own page
- Title at the top: What was the name of the challenge
- One or more paragraphs describing the challenge
- A sketch or photo of the challenge
- Did you have an difficulties? If so, how did you overcome them?
- What was the result of the challenge?
- Must be included in the table of contents (ToC)
- Part of the Project Rubric

Assignments Section

- Can come from your VEX IQ Workbook, VEX VR, or Google Classroom
- Complete all assignments in your Robotics Notebook
- Start on a new page with title at the top
- Title is formatted as a Header 2
- Must be included in the table of contents (ToC)
- Part of the Project Rubric

Idea Book Entries

- From your VEX IQ Workbook
- Complete all assigned Idea Book entries in the Assignments section of your Robotics Notebook
- Start on a new page with title at the top
- Include the section letter and subsection number (in this case A.6)
- Must be included in the table of contents (ToC)
- Part of the Project Rubric

A.6

It's Your Future Idea Book Exercise

Student Name(s): _____

Teacher/Class: _____ Date: _____

Instructions:

Imagine a robot that could solve a problem that you know about.

Draw a picture of what that robot might look like and give it a name in the box below.

Instructions:

Write about what your robot would be able to do and what problem it would solve. Write about how it would work and what type of control it would have (autonomous, teleoperated, or hybrid).

Excerpt from the VEX IQ Workbook

Class Notes Section

- Include any personal notes you wish to take during the robotics portion of this course
- No specified format, make it your own style
- Individual entries DO NOT need to be included in the table of contents (ToC)
- Part of the Project Rubric

This is Your Project

- This notebook **IS** your project, so keep it neat, organized and complete.
- It is the record of what you did during the robotics portion of this course.
- Work on it every class day.
- Getting behind will make it hard to catch up.
- Each project is 25% of your final grade in this course.
- Submit it on time so you don’t suffer a late penalty.

The END

be cool!
